SBA Tiebreakers

We will determine League Champions, first by Winning Percentage then by Head to Head competition. The below steps outline the process we will use.

Winning Percentage:

- Take the number of wins, add a ½ point for each tie, then divide by the number of games to determine a team's winning percentage.

Head to Head:

- If two teams are tied in head to head competition, then we will have a one game playoff to determine the League Champion.
- When multiple teams are involved, we will use the following criteria:
 1. All teams must have played the same amount of games against each other. (i.e. Each team has played each other twice.) If not, skip to step 3.
 2. One team must have sweep ALL other teams involved, in order to be crowned the League Champion.
 3. If no team has sweep ALL other teams, a multi-team playoff will occur. Seeding will be determined by drawing numbers.
